

know your way around roundabouts

There is a great deal of uncertainty when driving around Cayman's roundabouts. Drivers are unsure of what they are meant to do, and what other drivers are intending to do.

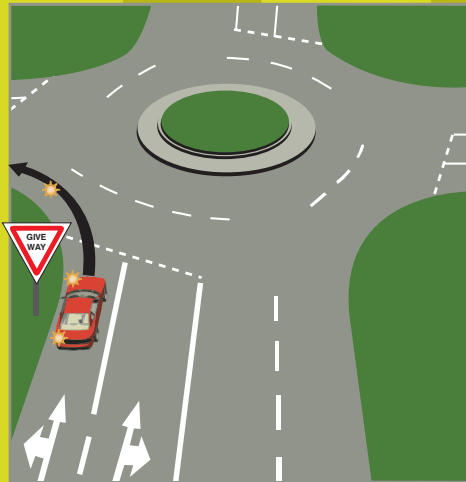

Dual Lane -Roundabouts

If you are going straight ahead...
at the roundabout (halfway around) you must signal a left turn as you pass the exit before the one you intend to take.

If you are going to go more than halfway around...
signal a right turn when entering the roundabout, then a left turn as you pass the exit before the one you intend to take.

If you are going left at the first exit...
get in lane and signal a left turn before entering the roundabout.

Reminders

- Traffic circulates in a clockwise direction on all roundabouts.
- Motorists entering a roundabout must give way to traffic already on the roundabout.
- Make sure that you are in the correct lane before entering a roundabout.
- Always use your signal light and check your mirrors.
- Do not switch lanes on dual-lane roundabouts.
